Support for Social Entrepreneurship Projects

The Millennium Festival, through the operation of its utility token, will act as a means for potential supporters of social entrepreneurship projects to invest in specific projects.

The projects will be chosen through a committee chosen for this purpose and will be the target of investment throughout the duration of the event's operation, that is, six

years old.

The projects will be selected by a committee and will have as a criterion the impacts that may exercise in their respective countries as:

- **Income generation for the population in a situation of social vulnerability;**
- **Preservation of the environment sustainability;**
- **Capacity building and inclusive education;**
- **Training and qualification for new forms of work;**
- **Digital inclusion**
- **Others of social interest.**
